Background
Mathematical Question Answering systems, such as [https://mathqa.wmflabs.org](https://mathqa.wmflabs.org) require labeled formulae. However, very little data is available so far.

Goal
• Develop a formula annotation recommender system for Wikipedia.

Tasks
• Build an API for the AnnoMathTeX ([https://annomathtex.wmflabs.org](https://annomathtex.wmflabs.org)) annotation recommendations.
• Build a seeding service to transfer the annotated formula concept knowledge to Wikidata.
• Build an integrated system and deploy it to Wikipedia.

If successful, you can proudly claim to be a Wikipedia developer.
